A Seamless Experience
Limiting Exposure Risk &
Enhancing Convenience

Strategic deployment of digital technology is critical to optimizing daily student experiences. Using digital applications, while considered convenient pre-pandemic, are now essential to limiting infection exposure risks and enhancing operations by providing crucial details that parents and students need on a daily basis.

Now, more than ever, students and parents want to understand what’s in their meal – the ingredients, and especially the nutritional and allergen information. So Happy provides a level of transparency previously unknown to our industry, with clear product descriptions and graphical representations for every nutritional category. There’s no more guessing when comparing one product to another. So Happy not only increases meal satisfaction by alleviating any concerns on the part of the parent with regard to food choices, but it also increases speed of service by allowing for the pre-ordering of meals. In a sense, So Happy equips parents and students with knowledge, peace and convenience at the push of a button - rare gifts in this new normal.

Digital-empowerment: safe and helpful school experience powered by So Happy

* Pew Research, 2020

53% of younger Americans say they've ordered from a local restaurant online or through an app due to COVID-19.*
Elevate & Connect

As you define your next normal, give your community access to useful digital tools that enhance their student journey and protect their wellbeing.

So Happy is the app that does it all for eating meals at school in the new normal.

- **Get the Facts**: complete transparency into what’s on the menu and in the food. Set flags for allergens of concern and view full nutrition information.
- **Increase Speed of Service**: pre-order feature that allows a student to select their lunch meal, even a week in advance, to save time.
- **Use Multilingual Option**: So Happy now provides all information in Spanish, as well as English.
- **Submit Feedback**: share thoughts using the Talk To Us portal built within the app.
- **Enable Alexa**: easily hear what’s being served and setup unique profiles for each student in the household. Just say, “Alexa, ask So Happy what’s for lunch today?”
