Safe and Adaptable Lunch in the Classroom

As the world evolves to the next normal, students, parents and schools adjust to new processes, and as a result, new expectations are emerging. With Sodexo’s broad offerings of convenient and healthy meal and snack options, you can facilitate faster and easier access to delicious, nourishing food choices that create an exceptional food experience at a proper physical distance and are appropriate to your unique return-to-school situation this fall.

From pre-packaged foods to wholesome hot lunches, our carefully crafted menus can be delivered to the classrooms using enhanced food handling processes that ensure a safe and healthy meal time. Enabled by our SodexoMyWay platform, the teacher engages with our team to make a contactless order for each class. These processes help ensure all the daily requirements for meal service are met in all phases of social distancing.

Convenience throughout all phases of social distancing
Signature, on-program menus that still offer choice
Healthy Balance

Delivering food they want, when they want it

*Modeled after the highly successful breakfast in the classroom and enabled with upgraded technology*.

*where available
Signature Experiences That Comply With All Regulations

Our meal programs offer freshly prepared food that can be available any time of day, with a wide range of food options, bringing unique flavors and craveable regional preferences.

Convenience throughout all phases of social distancing
• Maximizing speed of service, given social distancing requirements
• Addressing concerns with safety and security

Signature, on-program menus that still offer choice
• Preserving menu variety and creativity in limited service modes
• Providing hot and cold options
• Ensuring product availability in a time of unprecedented supply chain challenges
• Adhering to guidelines for reimbursement

Healthy Balance
• The classroom of the future represents wellness at all levels; this opportunity to serve in the classroom provides teachable moments.
• Balancing health, comfort, dietary preference and allergens
