

Reopen With Confidence

As you prepare to reopen, Sodexo offers a systematic approach to help you do so safely and confidently. The approach is based on a risk assessment similar to the one implemented in our infection control protocol in the healthcare environment. It will analyze, in detail, the different areas of your space to note the risk levels associated with all activities that take place there. This approach will provide a unique report, tailored to your school district, individual sites, students, faculty and staff. Using this proprietary approach, developed with best-in-class practices gathered from our team of experts who have experienced re-openings around the world, you'll receive professional advice and a custom-made proposal to manage your site comeback process smoothly.

We begin by taking inventory of the area, considering all activities that occur at that site. We review each activity for specific risks that could occur with all movement and traffic that will likely exist, once your students, faculty and staff return. For every risk identified, we then establish solutions for mitigation in your environment. Your assigned Sodexo team will work with you through our clear restart framework process and help you address the needs and opportunities that arise in the new day-to-day operations.

Risk Assessment

Mitigation Solution

Framework for Implementation and Control

Processes that give you the confidence to say, "Yes, it's time to open again."

3 Solutions To Respond To Different Levels of Risk

1

Risk Assessment

Our Risk Awareness Matrix allows our team to identify the risk rate of the location, given specific parameters.

2

Disinfection Solution Per Area

Based on the risks assessed in your schools, which are then reviewed and approved by you, we provide you with the appropriate solutions.

Low

1. Touch Points disinfecting
2. Facility Hygiene Solutions

Medium

1. Spatial disinfecting
2. Deep cleaning & disinfecting
3. Facility Hygiene Solutions

High

1. Spatial Disinfecting
2. Deep cleaning & disinfecting
3. Hygiene Testing
4. Facility Hygiene Solutions

3

Supervision

We will provide the right supervision model to ensure: Employee Training & Safety | Work Completion | Inspection Analysis & Reports

We provide visibility and transparency of operations with our award-winning Site Management System | "Best Enterprise Wide Transformation Project" during OPEX 2020

Creating the solution adapted to your level of risk

When we assess your risk, understanding service delivery before and after the impact, we establish not only how to reopen and address the needs of our new reality, but also how to identify areas of opportunity, rethinking the way services are delivered.

Establish Disinfection Solution for Every Level of Risk

- High Risk**
check closed spaces, re-engineer service delivery, review isolation protocols
- Medium Risk**
disinfect touch points and implement facility hygiene solutions
- Low Risk**
touch points disinfecting and facility hygiene solutions

Supervision and Reporting

- Essential employee training
- Ensure safety of students, faculty and staff
- Hygiene testing
- Insightful analysis and reports
