Craft a Positive Welcome Back Experience

As schools reopen their doors and students, faculty and staff get back into the swing of things outside their home environment, they will seek assurance that their school district is dedicated to sanitation and safety for everyone. Show your dedication to socially responsible school practices by giving your students, faculty and staff a welcome back to school package when they return to your building.

Help your students, faculty and staff focus on the tasks at hand and practice healthy hygiene habits by providing them with packages that include personal and desktop/workplace cleaning equipment and materials. This provision will also improve the academic performance of students, as well as the productivity of faculty and staff. Everyone will feel in control with a sense of responsibility for the hygiene of the space around them.

Set a Positive Note & Build Confidence
Encourage a Healthy & Safe Lifestyle
Provide Access to Health & Hygiene Products

Give students, faculty and staff agency and ownership over the hygiene of their space.
Prioritizing Health & Safety

These packages engage your students, faculty and staff, offer control over their personal and work space on campus and can even decrease the amount of cleaning services needed, when used consistently.

Set a Positive Note & Build Confidence
- Welcome your students, faculty and staff back with a positive surprise
- Positive messaging about the health, wellbeing and safety of your students, faculty and staff
- Offers a sense of control and assurance of cleanliness

Encourage a Healthy & Safe Lifestyle
- Packaging includes instructions for each product
- Supports personal responsibility for one’s desktop and the surrounding space
- Can lead to long-term reduction of cleaning costs

Provide Access to Health & Hygiene Products
- Welcome back guide
- Hygiene products
- Health & Wellbeing related products
