

# Assuring Associate Health & Safety

In today's environment, it is essential that buildings, accommodations and workspaces remain healthy for everyone. This is important to your staff as well as the people you serve. By actively monitoring people's temperatures at points of entry\*, your security and reception teams can control infection more easily. This will help manage building capacity and offer peace of mind to your people and to the people you serve.

With contactless human temperature monitoring at your building's entry points, Sodexo provides heightened safety for employees, visitors, customers and contractors. The installation of equipment limit unnecessary queuing in your reception areas, and the provision of protection equipment, materials and physical distancing trainings ensure the safety of everyone in the building.

Contactless Temperature Checking

Support Infection Prevention

Enhanced Access Control

*Help people feel at ease; securely monitor the temperature of every person at your organisation.*

\*subject to local legislation

**Assure their safety from the moment they enter your building.**

# ATTENTION

Please note that **Human Temperature Checking** is in operation at this site

Access will only be granted to those that show no signs of raised temperature or fever

## Safety and Security

With human temperature monitoring service, your commitment to safety is immediately clear, and it provides efficient building control for your security and reception teams.

### Contactless Temperature Checking\*

- Provision of monitoring equipment and training for your team
- Instant thermal images report temperatures higher than 37°C/98.9°F
- Temperature checking equipment for quick-moving queues at entrance

### Support Infection Prevention

- Ensure safety with physical distancing, PPE and contactless service
- Limit possible exposure in building interior
- Provide appropriate support for those with high temperatures

### Enhanced Access Control

- Establish access control scheme to supervise all entrances and exits
- Tightly monitor building capacity, queues and foot traffic routes
- Reduce visitor apprehension and ensure safety

\*subject to local legislation
