

Assuring Resident, Visitor and Staff Health & Safety

In today's environment, it is essential that senior living communities and facilities protect the health of everyone who lives in, works in, or visits them. By actively monitoring people's temperatures at points of entry*, your security and reception teams can control infection more easily. This helps better manage care and offers peace of mind to the people you serve.

With contactless human temperature monitoring at your campus building's entry points, Sodexo provides heightened safety for residents, visitors, and employees. The installation of equipment limits unnecessary queuing in your reception areas and the provision of protection equipment and physical distancing trainings combine to help reduce infection risks.

Contactless Temperature Checking

Support Infection Prevention

Enhanced Access Control

Help people feel at ease; securely monitor the temperature of every person at your community.

*subject to local legislation

Assure their safety from the moment they enter your building.

ATTENTION

Please note that **Human Temperature Checking** is in operation at this location

Access will only be granted to those that show no signs of raised temperature or fever

Safety and Security

With human temperature monitoring services, your commitment to safety is immediately clear and provides peace of mind to your residents, visitors, and staff.

Contactless Temperature Checking*

- Provision of monitoring equipment and training for your team
- Instant thermal images report temperatures higher than 37°C/98.9°F
- Temperature checking equipment for quick-moving queues at entrance

Support Infection Prevention

- Ensure safety with physical distancing, PPE and contactless service
- Limit possible exposure in building interior
- Provide appropriate support for those with high temperatures

Enhanced Access Control

- Establish access control scheme to supervise all entrances and exits
- Tightly monitor building capacity, queues and foot traffic routes
- Reduce visitor apprehension and ensure safety

*subject to local legislation
